ARTISAN EDITION CAJONS

José Hernández Díaz also known as 'Pepote' – was born in Huelva (Spain) in November 1976. He inherited his passion for wood from his father and grandfather, both of whom were aficionados of woodworking and model aeroplanes.

He first came across the Cajon at the age of 13 while watching a Paco de Lucia concert on television. Inspired to make his own, he soon started receiving commissions from friends and acquaintances when they realised that the Cajon was virtually impossible to get hold of in Spain. Pepote began taking these instruments to local shops in his city when he was just 15 years old. This marked the start of his woodworking training, where he focused on the production of musical instruments by studying techniques for making ancient musical instruments and guitars while also completing his studies in industrial furniture design.

Since then, he has been continually developing the instrument and relentlessly perfecting his craft. He came up with an aesthetic based on comfort, tried and tested more than 30 different kinds of wood for construction, created a special unbreakable string for the Cajon and tried 20 different kinds of varnish for the finish. The list goes on. Everything he does revolves around getting the best possible sound out of the instrument and providing the ultimate peace of mind for the percussionist.

Music is an essential part of early childhood development

Learning an instrument means learning for life. Making music in kindergarten, or at home at an early age, makes it easier for children to learn a new instrument later on. NINO® Percussion gives children the possibility to make their first contact with musical instruments, starting at an early age of 3 years.

Early childhood development includes encouraging children to live out their natural musicality. Playing an instrument helps them to gain a bunch of new skills, such as hand-eye coordination, fine and gross motor control, concentration, and of course a sense of rhythm.

NINO® Percussion specialized on rhythm, shaker, and classroom sets for musical programmes in kindergarten, schools, and other educational institutions. Those sets are flexibly combinable. The coloured buttons allow you to learn about the group size per set:

Small groups: max. 6 kids

Medium-sized groups: max. 16 kids

Large groups: more than 16 kids

NINO® Percussion hand percussion, drum circle and sound instruments are instruments for the whole family. They look good in the living or the children's room, are easy to storage, and most of them can be space-sparingly taken on a family trip. Nowadays, there are tons of good books and tutorials, that allow parents to easily learn an instrument with their children.
